

Dear Nicky,

I presented the TGA with a court filing that alleged a drug was misrepresented in the State of Kansas USA,

Seeing that the same drug was used in Australia, has there been any misrepresentation been made by the drug company, TGA, or other government agencies or personalities, I have been advised by the ACCC that as the therapeutic drugs regulator that they work with, that TGA would be the correct Agency to look into this matter. We could start with Safe and Effective, Safe, a novel "so called vaccine" gene therapy that we were told stayed within the injection site, now we know spike protein was produced in most of the organs of the body, we were told one week not safe for pregnant women then the next it was safe and yet at paragraph 144 we can see the humanised pregnant rodent trials miscarriages and still born information, we now know that the MRNA vaccines did not stop you from getting Covid nor did it stop you transmitting Covid, the list just keeps going.

I am going to cc the ACCC as the TGA is obviously compromised to be able to effectively review this situation.

To the ACCC,

I have presented the same information that you referred me to TGA with, they have now said, "Therapeutic Goods Act applies to activities undertaken in Australia" It seems to me that the TGA is unable to perform an investigation regarding misrepresentation of products in Australia, perhaps they do not have the power from our consumer laws to investigate such, as they seem to be referring to the Therapeutic Goods Act.

Now it falls back to the ACCC to take action.

Of course I knew this would happen, none of the States consumer bodies would look at it, the ACCC punched it thru to the TGA, The TGA being funded mostly by industry why would they have a deep dive into this poison that was coerced onto the people, oh don't forget WA also could forcibly inject their residents.

I am also putting the Australian Government Health Minister on Notice by way of this email and you will be held accountable for the inaction that is currently occurring.

Regards

Dear Sir

Thank you for your enquiry to the [Therapeutic Goods Administration](#) (TGA).

The TGA is part of the [Australian Government Department of Health and Aged Care](#), and is responsible for regulating therapeutic goods for human use including medicines, medical devices and biological products.

We have considered your enquiry and cannot provide any information as the Therapeutic Goods Act applies to activities undertaken in Australia.

Yours sincerely

Nicky

Dear TGA,

I have provided evidence of misleading medical goods and services to the Consumer Protection state based agencies and have been advised to contact the TGA regarding misleading medical products.

Please advise which agency deals with misleading products supplied to the Australian Public.

Regards
